Warehouse first-due pocket card

Water first, doors with fire control, on-deck early.

ON ARRIVAL

- [ ] Read the occupancy: house tactics or high-risk commercial shell?
- [ ] Complete the 360, or assign the next unit to finish it.
- [ ] Get a positive water supply before going deep interior.

FIRE ATTACK

- [ ] Match line size to fuel load and area.
- [ ] Consider 2½-inch lines or monitors for defensive operations.
- [ ] Open doors only with fire-control coordination.
- [ ] Watch the wind.

COMMAND AND CREWS

- [ ] Stage an on-deck crew forward; backfill it when used.
- [ ] Expand command early.
- [ ] Give conditions, actions, needs (CAN) reports and benchmarks.
- [ ] Keep crews together: no freelance splits.
- [ ] Call the Mayday early.
- [ ] Activate the personal alert safety system (PASS); give air and location.
- [ ] Know thermal imaging camera (TIC) white-out and no-contrast limits.

BEFORE THE CALL

- [ ] Assume occupancy may have changed.
- [ ] Verify current use against the building shell.

Based on NIOSH F2025-09 and NFPA 1700 warehouse considerations.
